BRINGS PEACE

OF MIND TO

CEFIC

A DIFFERENT KIND OF SECURITY FOR BETTER WORK...

'Thanks to VEEZO's unique technology, we can work with complete serenity.'

THE ASSOCIATION

ABOUT US

The forum for Europe's chemical industry

Cefic, the European Chemical Industry Council, founded in 1972, is the forum for Europe's large, medium-sized and small chemical companies, which provide 1.2 million jobs and account for around 14% of global chemical production.

VISION

Cefic is dedicated to promoting a thriving chemical industry that is widely recognised for :

- Providing sustainable, safe and resource-efficient solutions,
- promoting prosperity, growth and investment in Europe,
- providing safe and resource-efficient solutions to meet the challenges of future generations.

MISSION

The mission of the Association is :

- Serve its members by generating and aggregating scientific knowledge that furthers the Association's purpose in critical areas,
- offer services and expertise to its registrants in the regulatory, scientific and technical fields,
- engage, advocate and represent the industry in order to create the appropriate support and policy frameworks in Europe and beyond,
- add collective value to the activities of individual companies.

AT THE SERVICE OF THE CHEMICAL INDUSTRY

Cefic supports its members through a wide range of services, including monitoring services, networking events and guidance development.

Cefic also serves its members through :

- The Long-Term Research Initiative, which funds innovative research;
- Safety and Quality Assessment for Sustainable Development, developing and maintaining a harmonised assessment framework for logistics service providers; and
- The Responsible Care programme, which supports members in implementing their own national programmes.

Cefic manages over 75 sector groups, providing secretariat and project management services, as well as other needs-based services.

A COMMITTED PARTNER OF THE EUROPEAN UNION

Cefic strives to be Europe's most respected and trusted business association. Based in Brussels since its creation in 1972, it is a committed partner of the European Union, interacting on behalf of its members with the European institutions, non-governmental organisations, the media and other stakeholders.

Cefic members support the Paris Climate Agreement and strong action on climate change in line with the scientific advice provided by the Intergovernmental Panel on Climate Change. Cefic also supports the European Green Deal and Europe's ambition to become climate neutral by 2050.

This can only be achieved with the help of climate-neutral solutions and the circular economy developed by our industry.

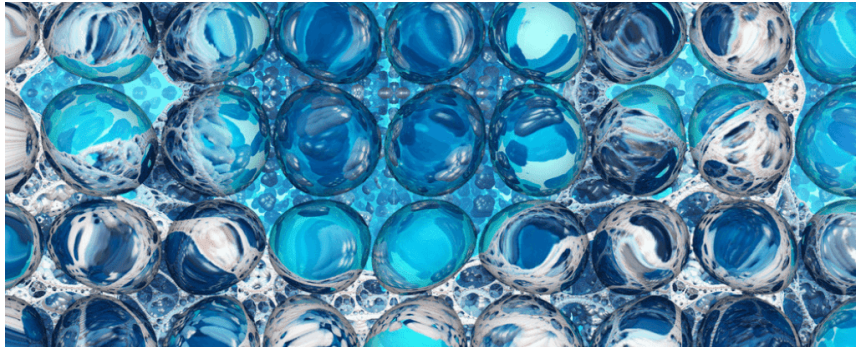

We want Europe to become a global innovation centre and a hot spot for investment in revolutionary climate-neutral and circular technologies. As an active member of the International Council of Chemical Associations, Cefic seeks to strengthen existing cooperation with global organisations to improve chemicals management worldwide.

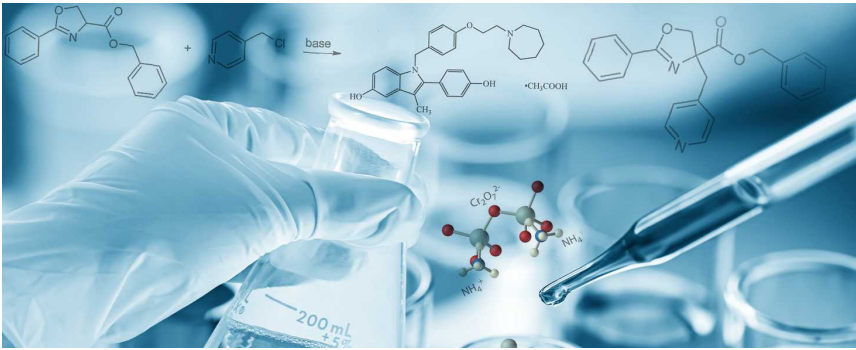

VEEZO FULFILLS

A FIREWALL IS NO LONGER ENOUGH...

'A firewall is no longer enough: we need to go further in traffic analysis. Without a more intelligent solution, we can't make the right decisions,' says Gilles Cuvellier, IT Manager at CEFIC. VEEZO's in-depth analysis gives us a better understanding of our security posture, more effective intrusion detection thanks to AI, and VEEZO's immediate protective reaction.'

VEEZO is an immediate predictive protection solution that protects our network infrastructure. Thanks to its intelligence, VEEZO can see and clarify vulnerabilities that other systems fail to spot. VEEZO analyses in depth and catches malicious communications, inbound and outbound, wherever they come from and for whatever service: IIS, Web, File, etc.

Even though CEFIC is moving towards a hybrid model, increasingly oriented towards the Cloud, VEEZO continues to provide the essential protection that CEFIC expects so that it can continue to work in complete peace of mind.

'Without VEEZO, we feel blind, and we have learnt to rely on this protection, to trust it and to include it in our ongoing safety assessment.'

CEFIC has once again renewed its confidence in VEEZO for the next three years.

VEEZO HELPS...

VEEZO OFFERS AN EFFICIENT AND AFFORDABLE SOLUTION

'As soon as VEEZO was up and running, we realised that we had been targeted for some time by a Chinese group that was exploiting certain vulnerabilities in our old servers. None of the systems we had in place had spotted these attacks,' explains Gilles Cuvellier.

We now realise that it would take several people to do the work that VEEZO does, and we haven't had to hire anyone to monitor our security. Thanks to the dashboards, we have a quick and accurate view of incidents, and the reports produced by VEEZO are all tools for better security governance. They are easy to read, comprehensive and effective, which means we can communicate better with each other. These reports are appreciated by our management, as they enable us to make the right choices more quickly, thereby improving our security maturity.'

Gilles Cuvellier, IT Manager CEFIC

VEEZO ... A PARTNER !

OUR COLLABORATION WITH VEEZO ? IT'S MORE THAN A COLLABORATION, IT'S A PARTNERSHIP !

'The relationship with VEEZO is very important! We're in regular contact with them, their responses are immediate, and their advice is always precise... This constant support and assistance makes them a real partner! VEEZO is one of our key references in terms of security, and we know we can count on them and their partners,' says Gilles Cuvellier.

VEEZO was created to help companies of all sizes and in all sectors to secure themselves differently, effectively and affordably. VEEZO wanted to eliminate the risk associated with human intervention by doing away with parameterisation and entrusting Artificial Intelligence and robots with repetitive tasks requiring an instant and precise response.

While automating responses, VEEZO wanted to maintain close contact with its customers. VEEZO, dedicated to cybersecurity, defines itself as a partner that favours close collaboration with its partners and customers to develop its solution in line with their wishes. VEEZO can also count on the community it has created, which enables it to respond effectively to attacks by sharing the benefits with other members, and to be more efficient and accurate every day.

VEEZO is not just a protection system that never fails, it also allows you to find out about the origins of incidents or attacks, and the information you need to improve your position and maturity in terms of security, and what's more, it suggests remedial action for each of the alerts recorded.

VEEZO gives you a window into the Unknown...

A WORD FROM THE DIRECTOR

Without our computerised documents and means of communication, Cefic would simply come to a complete standstill, and our members would be indirectly but quickly and severely affected. For several years now, cybersecurity has therefore been a critical part of our internal processes and procedures. It cannot be based on a single technology, and Veezo and Ozoos now form an essential part of the various layers of security needed to protect Cefic's IT.
