## THE HOSPITAL

### EPICURA'S MISSION

EpiCURA is an integrated, accessible and pluralistic multidisciplinary hospital group providing a wide range of specialised care to meet the needs of the population of the Mons-Borinage and Ath catchment areas. Patients receive comprehensive, personalised care as part of a modern multidisciplinary approach that complies with safety and quality standards. EpiCURA is a socially responsible employer and economic player in its region.

### EPICURA'S VISION

EpiCURA is the benchmark hospital in its catchment area, enjoying the trust of the population, patients and professionals alike. EpiCURA is a recognised player in the hospital sector, attractive to patients and professionals alike. EpiCURA delivers quality care in a safe environment with a view to preserving and improving the health of the population it serves. EpiCURA organises access to quality care and services as well as specialised techniques and programmes through its different hospital sites, its policlinics and its mobile services. EpiCURA is part of a collaborative network of local and regional hospitals and works in partnership with front-line and medico-social players. EpiCURA is pursuing its commitment as a sustainable, innovative and responsible social enterprise.

### LES VALEURS D'EPICURA

#### Professionalism

We are committed to putting all our skills at the service of our patients. We always work with rigour and precision. We aim to get the job done right, whatever the difficulties. We set an example on a daily basis and convey a positive image of the institution. We are responsible and loyal in our actions and decisions.

#### Respect

We value individual differences, accept cultural and ethnic diversity and do not make discriminatory judgements. We respect philosophical, moral and/or religious choices. We respect institutional rules and good practice. We respect the privacy of our colleagues and patients. We work in complete confidentiality.

#### Caring

We care about others, their person and their rights, in order to enhance their well-being. We care for everyone. We show consideration for all. We are attentive to the quality of verbal

and non-verbal communication. We maintain a warm atmosphere with our staff and patients..

#### Collaboration

We are proud of our differences because they are a source of inspiration and complement each other. We recognise the strength of teamwork, in which everyone's individual values are expressed. We communicate effectively and appropriately to ensure understanding. We encourage mutual support and solidarity. We support others when they are struggling or learning.

#### Progress

We are committed to continuous learning and improvement. We offer constructive criticism and are open-minded. We analyse our professional practices in order to develop our skills. We demonstrate a willingness to adapt, initiative and flexibility in order to constantly evolve. We thrive on initiative, creativity and innovation.

# VEEZO DROPS !

## IMMEDIATE AND ONGOING SOLUTION

*'VEEZO has proved indispensable in strengthening our security and ensuring the protection of our sensitive data. From the outset, VEEZO provided complete visibility of all our communications between our network and the Internet. VEEZO identifies, analyses, classifies and reacts immediately to abnormal behaviour and potential threats by instantly blocking the malicious payload and alerting us to its action,' said Bruno Liénard, CIO of EpiCURA. VEEZO's integration was seamless and its user-friendly interface made it easy for our security team to adopt. Thanks to its advanced real-time analysis capabilities and automated responses, we have considerably reduced the risk of cyber-attacks and improved our overall security posture. What's more, the flexibility of the solution means we can adapt it to the specific needs of our sector, guaranteeing ongoing, effective protection..'*

VEEZO relies on IA, automation, and its community of customers to deliver an innovative solution that needs no adaptation time to be effective as soon as it is installed. Safety rules and processes are updated in real time based on the experience of other customers and the advanced databases it uses. VEEZO's intelligence makes it possible to secure in a different way by taking potential human error out of the equation and drawing on everyone's experience to be even more precise and efficient.

# VEEZO

## IS THERE...

### AN INSPIRING PARTNER ...

*'We particularly value the relationship we have with VEEZO. Their responsiveness, professionalism, experience and inspiring advice are invaluable to an organisation like ours. We didn't find any equivalent in Belgium when we were looking for people to help us. Our sector demands sophisticated security and an immediate response in the event of an attack. Our data is sensitive and confidential, and a shutdown of the hospital following a hacking attack would be terribly damaging! says Bruno Liénard.*

The VEEZO experts listen to their customers and can supplement the information available in the dashboards and reports that are already available.

Bruno Liénard, *Directeur Informatique*

# VEEZO ANALYSES, REPORTS —

## A WINDOW ON THE UNKNOWN...

VEEZO immediately drops malicious charges to protect the customer. It is therefore important to explain the reasons for this decision and provide clear details to make it easier to understand. VEEZO dashboards provide information that other security products don't, and facilitate communication between the partner and its customer and, most importantly, between the IT department and hospital management.

*'As soon as it was installed at EpiCURA, VEEZO detected a virus that was lying around on one of our scanners without our antivirus detecting it, even though it was up to date. A few weeks later, VEEZO blocked an exploit that our security products hadn't seen coming!'* says Bruno Liénard.

The various dashboards detail each incident or attack: temporality, histograms, categorisation, statistics, volumes, occurrences, severity, aggressiveness, domains, etc. All this crucial information is needed to understand the nature of the challenge we are facing. Bruno Liénard adds: *'For each of the tables or reports, we can choose different parameters and activate the relevant filters. VEEZO also provides remediation advice to help us improve our security posture and become more mature.'*

VEEZO offers, among other things, a report in NIS2 format that includes all the information contained in VEEZO to simplify the path to compliance. Thanks to these webhooks and APIs, it is also possible to integrate them into other systems or other reports.

*'We are actively collaborating with VEEZO to ensure that the dashboards and reports meet the requirements of our constantly changing services more effectively every day,'* adds Bruno Liénard.

## A WORD FROM THE DIRECTOR

*'The Veezo solution is like a good pillow for a CIO: you know you'll be able to sleep soundly!'*

- Bruno Liénard, Chief Information Officer (C.I.O.) -
