TESTIMONIAL

MACQ TRUSTS

VEEZO

MORE THAN 3 YEARS OF COLLABORATION AND TRUST

'Thanks to Vee's unique technology, we feel safe. We can organise our work with complete peace of mind. This Virtual Security Officer ensures our safety despite our complex environment.'

THE COMPANY

WE HELP MAKE THE WORLD A SAFER & HEALTHIER PLACE

At Macq, our purpose is to make the world a safer place for the estimated 7.8 billion people who call it home. We believe in the transformative power of innovative mobility solutions to connect and drive economic growth for this diverse global community.

As a leader in the industry, we are committed to promoting safety and security with over 1.3 billion vehicles on the road. We take our responsibility seriously and work to address the root causes of insecurity by implementing safety regulations and creating solutions that benefit everyone.

OUR AMBITION IS OUR DRIVER

The global market of ANPR and AI based cameras for Smart Mobility purposes is growing rapidly and we expect that within 4 years the market volume will at least double in size. Our ambition is to ensure our leading position in the Belgian ITS & Smart Mobility market and to become a reliable, valued, and preferred business partner not only in Europe, but worldwide.

To achieve this, we will focus on both, establishing mutually rewarding international partnerships and building new compelling and outstanding solutions for our key customers. That's why research & development represents 30% of our sales revenue! Macq continually pushes its products & services into the realm of the unknown, the untried, or the highly desirable. Unique to MACQ is that we consistently strive to provide the ITS & Smart Mobility market with leading-edge products. Join us in our journey to revolutionize mobility and make it easier and healthier for everyone.

WE PUT MOBILITY IN MOTION THANKS TO INTELLIGENT ROAD SOLUTIONS

At Macq, we bring a 100-years of expertise and knowledge in mobility to the table, honed by our understanding of the specific needs of each country. Our history and understanding of the industry allow us to provide customized solutions that address the challenges of each market, resulting in a strong presence in multiple countries worldwide, especially in Europe where our headquarters is based in Belgium. We are dedicated to constantly improving mobility through innovative solutions and pushing boundaries in the transportation industry. Our innovative spirit, combined with our extensive experience and strong partnerships, make us a leading and game-changing company in the field.

As a Belgian family-run company, we have the advantage of in-house software and hardware development, enabling us to easily adapt to our customers' requirements. We focus on both, building outstanding solutions and establishing mutually beneficial partnerships. Our goal is to continuously seek new and better ways to improve road safety and security, minimize disruption, and enhance quality of life, health, and the environment. Our intelligent road solutions support policymakers in protecting citizens and promoting sustainable transportation options. With 100 years of experience, we understand the unique challenges of each market and provide customized solutions to meet the needs of our clients.

MACQ Mobility Manager (M³), Your Smart City Mobility Platform

Like MACQ, VEEZO provides tools that make life easier. Technology at the service of people...

VEEZO

SEES...

A WINDOW ON THE UNKNOWN

'Recently, VEEZO discovered and trapped malicious activity starting from the computer of one of my colleagues, who had been using specific Chinese software. During an update in the middle of the night, VEEZO reacted immediately by blocking spyware that was being launched from this machine, and alerted us immediately so that we could repackage this computer when we had the time, since the threat had been eliminated. The other security products had not seen the threat, even though they were all up to date.' Says Xavier Caufriez.

Thanks to VEEZO's reports, we have a view of our safety position, and a means of communicating objectively with each other. The VEEZO dashboards provide a detailed view of incidents and useful information for further improving our safety.

VEEZO PROTECTS !

IMMEDIATE AND COMPLETE PROTECTION

'VEEZO's protection identifies, blocks and dismantles threats that other security solutions don't even notice' says Xavier Caufriez, Head of IT

'VEEZO is an indispensable security complement that automatically and continuously analyses traffic, identifies threats, protects us immediately and alerts us with its dashboards and automatic reports.'

VEEZO is an advanced predictive AI protection system that plays a multifaceted role in safeguarding our network infrastructure. It begins by defining security rules, continuously updating them along with its detection engines, and acting as an adaptive, transparent bridge within our network.

VEEZO thoroughly analyzes our network, identifies vulnerabilities, and proactively fills security gaps. It also provides heightened attention to active threats by applying more stringent security policies. This innovative solution operates as a predictive AI model, instantly blocking malicious activity to ensure the utmost protection for our network environment.

Xavier Caufriez, Head of IT

VEEZO SUPPORTS

KNOWING THAT WE HAVE EFFECTIVE PROTECTION MEANS WE CAN WORK WITH COMPLETE PEACE OF MIND

'VEEZO's support is really appreciated. Their availability, professionalism, flexibility and communication between us are important elements in our collaboration, and reassure us about our safety.' adds Xavier Caufriez

VEEZO not only complements our security, it also protects us immediately by analysing all flows, identifying threats, dismantling them immediately and alerting us immediately. We know we've been protected, and can go about our business knowing we're protected. We will carry out potential remediation tasks when we have the time, and not in a hurry because the threat has already been averted.

VEEZO seamlessly complements our existing security system, enhancing our overall protection by filling potential gaps and providing an additional layer of defence. VEEZO ensures that everything is genuinely fine within our network, providing the peace of mind that our cybersecurity measures are robust and effective, even in theory.

In the ever-evolving digital landscape, VEEZO keeps us informed about the effectiveness of our security posture, ensuring that we remain well-protected against emerging threats.

Recognizing the challenges of securing IoT devices, printers, cameras, and more, VEEZO conducts continuous vulnerability diagnoses for these devices, helping us proactively address potential security weaknesses. VEEZO adapts to the OT world as it has adapted to the IT world. VEEZO makes no distinction between these two worlds, since it analyses all flows, whatever they may be, without distinction. VEEZO takes care of monitoring network flows that may be beyond our control, providing valuable insights into their security status and helping us mitigate risks.

THE WORD OF THE PRESIDENT

Macq is delighted to be working with Veezo. Both our companies develop tools that are sometimes very complex, to simplify the everyday lives of our users, whether in terms of IT security (Veezo) or mobility and road safety (Macq). We are convinced that the future of our respective companies is already being built today with the help of new digital technologies in which AI plays a driving role.

- François Macq, Chairman -
